Cancer has emerged as the second-leading cause of death globally after cardiovascular diseases. Proportion of deaths due to cancer around the world increased from 12% in 1990 to 15% in 2013 while the number of new cases almost doubled in India during the period.

In India, deaths from the disease have increased by 60%, according to the latest report 'Global Burden of Cancer-2013', released worldwide on Friday.

"Even if we adjust for the rise in population in India over this period, the new cancer cases have increased by 30% per unit population and deaths have risen by 10%, "says Lalit Dandona, co-author of the study and Professor at the Public Health Foundation of India and Institute for Health Metrics and Evaluation.

In 2013, there were 14.9 million new cancer cases registered globally, whereas 8.2 million people died due to the disease. The report is based on a global study of 28 cancer groups in 188 countries by a consortium of international researchers from University of Washington and Institute of Health Metrics and Evaluation.

The report suggests that new cases of virtually all types of cancer are rising in countries globally -regardless of income-but the death rates from cancer are falling in many countries primarily due to its prevention and treatment. However, it says there is a threat of increasing incidence in developing countries due to ill-equipped health systems.

While incidence of breast cancer is highest in India as well as globally, most number of cancer deaths in India are caused due to stomach cancer, which is globally the second most common reason for death.

- (a) Cancer is next only to \_\_\_\_\_ diseases resulting in deaths, worldwide.
- (b) The report \_\_\_\_\_ claimed that cancer deaths in India have risen.
- (c) The death rates from cancer in many countries are coming down mainly due to \_\_\_\_\_ and treatment.

1. Children are conserved as the most important asset of their country however improper understanding of the parents and poverty making them the reason for the weakness of the country instead of being the power of the country. Most of the children under poverty line are forced to do child labour daily even after a lot of awareness programmes run by the government and future welfare of society towards the welfare of the child.
2. Children are the new flowers with powerful fragrance. However, some people are declining the power and destroying the future of the country just for earning a small amount of money by illegally involving the growing kids. They are playing with the moral of the innocent people and their kids. Protecting children from child labour is the responsibility of each and every citizen living in the country. Child labour is the socio - economic issue which needs to be solved on ultimate basis.
3. After the independence of the country, various laws and regulations were implemented regarding the child labour. However, it did not find its end in the country. Child labour is ruining the innocence of the kids by directly destroying their health physically, mentally, socially and intellectually. Children are the lovely creation of nature but it is not fair that due to some bad circumstances they are forced to do hard labour before their appropriate age.

	<p>4. Child labour is the global issue which is more common in the underdeveloped countries. Poor parents are unable to afford the education expenses of their kids and they are unable to earn enough money for the family survival. So, they better choose to involve their kids in hard work to fulfill their needs instead of sending them to school. They believe that schooling is a waste of time and earning money at an early age is good for their family. It is the urgent need to aware the poor people as well as rich people (to not to use asset of country in a wrong way) about the bad effects of the child labour. They must be availed with all the resources which they lack. Rich people should help the poor people so that their children too can get all the required things in childhood. It needs some effective rules and regulations by the government to completely end its roots forever.</p> <p>(a) Inspite of the effects of the government, why are the children forced to do child labour ?</p> <p>(b) What is the responsibility of every citizen ?</p> <p>(c) How is the child labour ruining the future of the children from poor families ?</p> <p>(d) How can we eradicate child labour completely from our country ?</p> <p>(e) Find the antonym of the word 'disadvantage' in Para 1.</p> <p>(f) Which word in Para 3 means the same as 'execute' ?</p> <p>(g) Find the antonym of the word 'waste' in Para 1.</p> <p>(h) Find a word which means the same as 'living' in Para 4.</p>
